Experience

University of Arkansas – Enterprise Systems Administrator (Graduate Assistant). **May 2024 – May 2025**

- Provide and manage student software access across various courses of Sam M. Walton College of Business.

Ritter Communications – Software Developer. **Jan 2021 – May 2024**

- Owned the full SDLC — analysis, design, build, deploy, and support — for internal SaaS and custom built software systems.
- Authored end-user & admin documentations, and trained multiple group of internal users on solutions implemented.
- Saved company over \$50,000 in licensing by developing an internal provisioning solution. Improved efficiency by 80%.
- Developed and managed integrations and data custodianship across platforms including Salesforce, Google Analytics, Meta Insights, HubSpot, Elation (billing), PayNearMe (payments), UKG (workforce management), and Harmonic (network).

AT&T Inc – Intern. **June 2020 – July 2020**

- Completed interactive training covering emerging technologies (5G, AI/ML, cybersecurity, IoT), network fundamentals (broadband, cable routing, fiber, wireless networking) and business acumen (project management, change management).
- Networked with 30+ executives detailing their insights on innovation, leadership, time management and corporate values.

Education

University of Arkansas - Sam M. Walton College of Business **May 2025**

Master of Science in Information Systems — GPA: 4.00

Arkansas State University **Dec 2020**

Bachelor of Science in Computer Science — GPA: 3.25

Lovely Professional University **May 2015**

Associates Degree in Electronics and Communications Engineering — GPA: 3.43

Certifications

Microsoft Certified: Azure Fundamentals (AZ-900)

Professional Projects

Salesforce CPQ Implementation - Ritter Communications **Nov 2022 – Dec 2023**

- Thoroughly analyzed the existing sales processes and collaborated with cross-functional teams including Sales Operations and Revenue Operations to gather requirements.
- Implemented CPQ to streamline the sales process by bringing the quoting process into Salesforce, and automated product configuration, pricing rules, quote generation, and eSignature using DocuSign.
- Conducted comprehensive user training sessions and User Acceptance Testing (UAT) to facilitate smooth adoption of CPQ.
- **Used:** Salesforce CPQ, Lightning Web Components, Apex, Triggers, Validations, SOQL, Visualforce, Custom Objects, Approval Process, Flows, DocuSign.

Salesforce CPQ Document Processing - Ritter Communications **Nov 2022 – May 2023**

- Developed an integration between Salesforce, DocuSign and SharePoint to automate the processing, e-signing, storage, and maintenance of customer quotes and contract documents.
- Developed a multi-software solution that streamlines the processing of quotes generated in Salesforce. This involves sending the quotes to customers via DocuSign and subsequently retrieving and storing them in a Digital Library within Sharepoint. This involved Salesforce development, including VisualForce, ApexClass, standard and custom objects, ApexTriggers, and validations, as well as DocuSign development, including custom templates and fields.
- **Used:** Salesforce PubSub/REST API, SOQL, gRPC, OAuth, JWT, DocuSign API, Microsoft Graph/REST API, Python

Fortinet SD-WAN Auto Provisioning - Ritter Communications **May 2022 – Sept 2022**

- Designed, developed and deployed an Automation tool for provisioning SD-WAN for providing MAN based cloud services.
- A full stack web-app for provisioning automation of cloud based products over FortiGate 40F & 601F platform
- The app requests basic customer info, product selection, CPE identifier, and provisions services on the network using IPsec VPN tunnels between datacenter and customer premise. App further stores the information for future move, add, change etc.
- **Used:** FortiGate API, Vue.JS, Node.JS, Vuetify, Django, Python, HTML, CSS, MySQL, Git, Apache HTTP server, WSGI

Academic Projects

Predictive Analytics for Superstore Membership Upgrades - University of Arkansas **Mar 2025 – Apr 2025**

- Applied the CRISP-DM framework to build a machine learning model to identify customers likely to purchase membership.
- Trained and compared multiple supervised-learning algorithms — with both continuous and categorical target predictors.
- Selected the best model for scoring based on validation misclassification, and identified key predictors influencing upgrades.
- **Used:** SAS Enterprise Miner, CRISP-DM, Logistic Regression, kNN, Decision Tree, HP Forest, Gradient Boosting.

Data Warehousing & Analytics - University of Arkansas**Mar 2025 – Apr 2025**

- Built an end-to-end analytical data warehouse to study the impact of weather patterns and public events on vehicle accidents.
- Imported datasets from public and government sources (weather, sports events, traffic) using SSIS, and REST APIs.
- Performed ETL workflows to clean, transform, and denormalize data into Star Schema (Fact/Dimension) for analytics.
- Created Tableau dashboards for visualizing correlations between weather, public events and accident rates.
- **Used:** Microsoft SQL Server, SSIS, SSMS, T-SQL, REST API integration, Tableau (visual dashboards)

Shopify Migration - Threads 479 - University of Arkansas**Jan 2025 – Apr 2025**

- Migrated Threads 479, a local boutique in Rogers AR, from its existing platform to Shopify at no cost.
- Developed a new website with improved product SEO and Integrated Shopify with social media platforms to drive traffic.
- Provided custom-built analytics dashboards for better business insights.
- Conducted comprehensive training for business owners on Shopify's features and best practices.

Azure DevOps - Project Management - University of Arkansas**Aug 2024 – Dec 2024**

- Developed an information management system for Walton School to manage student software access across various courses.
- Led a fully Agile, DevOps-driven software development lifecycle—creating user stories, defining story points, planning and tracking tasks, maintaining backlogs, and overseeing releases and sprints.
- **Used:** Azure DevOps, Github, HTML, JavaScript

Homework Website - Arkansas State University**Jan 2020 – May 2020**

- Developed a dynamic, full stack website for learning management.
- Supports admin control, user management, authentication, course creation, assignments, and automatic grading.
- **Used:** HTML, CSS, Django, Python, SQLite3, Git, Amazon Web Services (AWS).

Discussion Board Website - Arkansas State University**Jan 2020 – May 2020**

- Developed a web-based discussion board application that lets students discuss a topic under instructor's supervision.
- Allows student interaction with teachers and peers. Supports authentication, password hashing, recovery and course management.
- **Used:** HTML, Bootstrap, JavaScript, NodeJS, SQLite3, Argon2, Git, Microsoft Azure.

Trend analysis of language elements in Java - Arkansas State University**Jan 2019 – May 2019**

- Researched the trend in popularity of two language elements in Java over a decade to gain insights into which has been more widely adopted among developers.
- Used a parser library to read the Java code and generate a syntax tree. Then, search tree to traverse the syntax tree and look for nodes that represents Switch and If statements. Later, generated graphs to visualize the trend.
- **Used:** Java, MySQL, Open source project codes from GitHub for research.

iOS Task Automation App - Arkansas State University**Jan 2019 – May 2019**

- Supports event/task creation, selection of triggering action for the event, such as time, location and connected accessories.
- **Used:** XCode, Swift, and APIs: MapKit, AccessoryKit, UIKit.

Health Data Visualization, Windows App**June 2019**

- Shows information and visualization of specific health conditions of a specific US county from over a decade.
- Capable of user signup/logins, password hashing, state selection, county filtration, health condition filtration.
- **Used:** C#, Microsoft Visual Studio, Microsoft SQL Server.
